HI-Flow Oyster Cage

Durable floating gear built for high energy water

Oyster
farming
the
watermen's
way

Description

Portable, lighter weight floating cage provides great flexibility and stability for surface grow out. The HI-Flow cage is available in either aluminum or PVC coated 8-gauge wire and holds six mesh bags. Attached to two 80L, Go Deep floats, the HI-Flow is Hoopers Island's signature surface system designed for high energy water environments. Two bungee closures provide easy access to manage oysters during grow-out process.

Features & Benefits

- Open weave construction enhances water flow around oysters and reduces areas for biofouling
- Float riser keeps gear from being pushed by wave energy increasing stability and security
- Lighter weight allows for easier transport and farm management

Price*

- Coated Wire Cage
 - Includes bags \$ 259.00
 - Without bags \$ 215.00
- Aluminum Cage:
 - Includes bags \$ 330.00
 - Without bags \$ 285.00

Specifications

- Six (6) Go Deep, mesh bags
- 4.5" x 4.5" 8-gauge wire mesh
- Side support panel provides extra reinforcement to prevent wave torque
- Choose mesh bags in one of three sizes:
 - 4mm
 - 9mm
 - 14mm
