# Seed Sanctuary

First solar powered, in-water oyster seed incubator

## Description

Hoopers new, affordable seed sanctuary is an ingenious design that allows you to grow oysters in a protected, in-water environment adjacent to your aquaculture gear or in designated lease areas

Fabricated with proven components, the design marries elements from larger nursery systems with surface gear grow-out equipment to create a smaller, portable incubator for early-stage seed.

## Features & Benefits

- No electricity needed
- Protects oysters during grow out from 2mm to 6mm
- Effective and easy transport from nursery to adjacent grow out gear
- Allows integration of multiple sanctuaries
- Easy to stock, access and manage

## Price

\$ 595.00

*\*Excludes solar kit*

## Specifications

- Solar powered filter\*
- Utilizes FLUPSY basket and silo
- Durable, fiberglass silo basket with fitted lid
- Two (2) GD-11 floats provide strong, secure buoyancy
- Anchored with two long line clips

## Terms

- Allow one week to install micron of choice
- Shipping extra
- Full payment required prior to shipping
- Add 3% for credit card orders
